## ROULETTE

A long-time tradition in European casinos, this version of Roulette is fun and easy to play. The Player simply places their bet with casino chips or special colour roulette chips. If special coloured roulette chips are used, you determine the value of the chips when you buy in. After the bets have been placed on the layout, the Dealer spins the ball; if it lands where you have placed your chip(s), you win! The payoff is determined by how many numbers your chip has covered (as listed below). Coloured Roulette chips must be redeemed at the Roulette table before you leave.

## BIG SIX

In this thrilling version of the classic "Wheel of Fortune", Players wager that the pointer will indicate a certain section after the turn of a large wheel. The Big Six wheel has equally spaced sections that represent betting areas on a specially marked table. After the Players finish placing their wagers on the table, the Dealer then declares "No more bets" and spins the Big Six wheel!

The wheel must complete at least three revolutions to be a valid spin. Once the wheel comes to rest, the Dealer will announce the winning section on the wheel and pay out the winning wagers according to the payout schedule shown below.
